Vic Welland,
Sales Engineer, Turnamics

“This is the machine I’ve been waiting for my entire career!” said Vic Welland, a veteran machine engineer and operations guru at Turnamics, when describing Fowler’s zCAT Portable Coordinate Measuring Machine (CMM). Vic discovered the zCAT at IMTS in 2018. As Vic walked the show floor, the zCAT demo stopped him in his tracks. He marched over, demanding, “Do that again!” Vic had to see the “Touch & Teach” feature one more time.

The zCAT’s principle is that you create the measurements, and the software learns and records your moves. Then, you just hit ‘play’, and the machine will repeat your measurement path exactly.

When Vic saw the zCAT in action, he knew it was very different from traditional CMMs. He pictured using it in his Asheville, North Carolina shop, where his team of 40 makes parts for bicycle, transit, and telecommunications industries.

Vic finds training staff on the zCAT to be easy & quick: “I can take anybody off the floor, give them a ten-minute crash course, and they can check parts.”

The company now uses both a zCAT and a Axiom II with the same “Touch & Teach” feature. Vic values the zCAT’s ease of use, reliability, and creative workflows - He’s cleverly created his own daisy-chain jigs so that parts can be swapped out continuously while the zCAT keeps humming along.

Check out turnamics.com and industrynine.com to see what Vic and the crew at Turnamics produce. To learn more about the Fowler zCAT Portable CMM go to <https://bit.ly/40UPMHb>

zCAT Portable CMM

Features:

- Compact for use at the machine center
- Accuracy: MPEE 0.0003"/0.008mm
- "Touch & teach" software programmability w/ Fusion
- Completely portable, only 30 lbs.
- Ethernet communication (Bluetooth optional)

Order No. 54-950-001-0

Axiom Too

The complete inspection system.

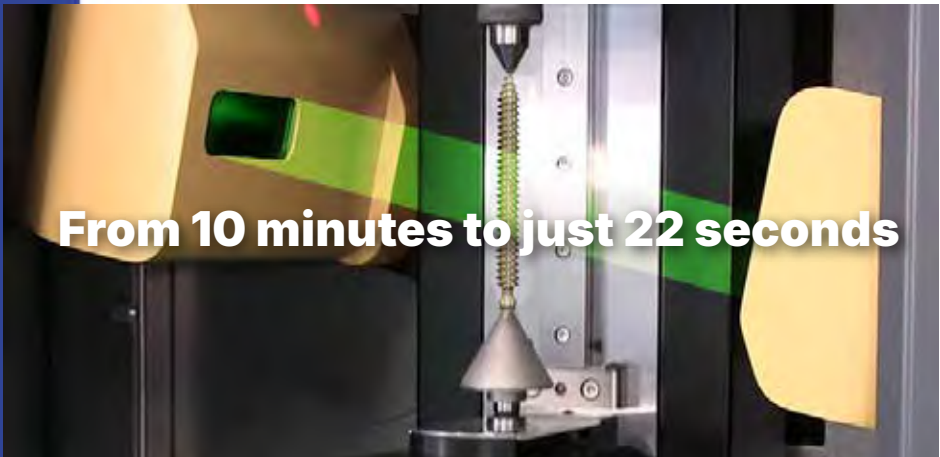

Features:

- Short learning curve and compact footprint
- Y-axis options from 600mm to 1500mm
- Workshop-friendly with vibration protection
- Friction-free air bearings, aluminum bridge, and granite table

Precision at Lightning Speed: Transforming Medical Manufacturing

In medical technology, strict quality standards require precise inspections, often taking considerable time and cost. Brüttsch/Rüegger Tools implemented the Sylvac-SCAN S25T, an optical, non-contact measuring system, at a Swiss manufacturer of bone screws and drills to streamline this process. The fully automated system reduced the inspection time from 10 minutes to just 22 seconds, achieving a 96% time savings and eliminating the need for multiple manual tools and logging steps.

The Sylvac-SCAN S25T consolidates dimensional accuracy checks into a fast, non-contact measurement that logs and archives data digitally, saving 8,027 hours annually and paying for itself in six months. Brüttsch/Rüegger also offers ongoing support, training, and maintenance, ensuring reliable performance. This solution proves to be an efficient investment for maintaining precision in medical manufacturing.
