Reducing Cost Per Piece = Advantage YOU!

Pitbull® Clamps

**Strongest,
Lowest Profile Clamp**

- ▶ Extremely low bite
- ▶ Positive down force
- ▶ High strength A2 Tool Steel virtually eliminates rip-out
- ▶ Simple, sturdy, high quality design and components
- ▶ Great option with hydraulic cylinders
- ▶ Virtually eliminate lost work

TalonGrip™

**Increase Functionality
on Standard Vises**

- ▶ Grip low - save on material costs
- ▶ Positive down force
- ▶ Simple bolt on system that will allow you to perform aggressive machining operations
- ▶ Ideal for small lot sizes, difficult applications or proto-type work
- ▶ Jaws are not heat-treated to allow for custom modifications, grips are made from S7.

ID Xpansion™ Clamp

**Ideal for Secondary
Operations on Lathe Parts**

- ▶ Low profile
- ▶ Ideal for secondary operations on lathe parts
- ▶ Easily machined to size on lathe or mill
- ▶ Excellent for palletized setups
- ▶ Allows more parts per workcube or fixture plates
- ▶ Heat-treated and coated screw for long life
- ▶ Clamp body made of mild steel for machinability
- ▶ Tighten with hex key or hydraulic pull cylinders
- ▶ Longer screws available for hydraulic applications

Uniforce® Clamps

**Reduce Tool Change Time -
Best for High Density**

- ▶ Increases production
- ▶ Minimizes tool changes
- ▶ Holds two parts with equilateral clamping action
- ▶ Ideal for clamping flat or round workpieces
- ▶ Reduces wasted space
- ▶ Easily mated to hydraulic pull cylinders
- ▶ Ideal for pallet changers
